

# TRAINING DAYS

LATEST EDUCATIONAL INFORMATION ON TRAINING COURSES, DISTANCE LEARNING, COMPANY TRAINING DAYS, SEMINARS, AND WORKSHOPS CURRENTLY AVAILABLE. THIS SECTION WILL ALSO INCLUDE COMPETITIONS, AND STUDENT OFFERS AMONG OTHER EXCITING OPPORTUNITIES

## ESRI LAUNCHES SPATIAL DATA ANALYSIS MOOC

ESRI is to provide a free Massive Open Online Course (MOOC) for people who want to learn about the special capabilities of spatial data analysis. The course will include hands-on exercises, short video lectures, quizzes, case studies and discussion. It will run between March 4 and April 15 and require two to three hours of study per week. Those who complete the course will receive a certificate and be eligible to win prizes. Students will get free access to the full analytical capabilities of ArcGIS Online. Previous experience with GIS software will be helpful.

For more information and to register, visit [www.esri.com/landing-pages/training/spatial-analysis](http://www.esri.com/landing-pages/training/spatial-analysis)

## EUROSDR E-LEARNING COURSES OPEN

The 2015 series of e-learning courses from EuroSDR is now open for registration. The four e-learning courses will be introduced during a seminar hosted by BEV in Vienna between March 9-10. The courses are:

### Mapping using high-resolution satellite imagery (March 16-27)

Tutor: Dr Daniela Poli, Terra Messflug GmbH, Austria

### Change detection in High-Resolution land use/cover geodatabases (April 7-17)

Tutor: Dr Clément Mallet, IGN, France

### RPAS in land survey – theory and practice (April 27-May 8)

Tutors: Dr-Ing Görres Grenzdörffer, University of Rostock; Dr-Ing Michael Cramer, University of Stuttgart, Germany

### International standards for geographic information (June 8 -19)

Tutor: Prof. Wolfgang Kresse, University of Applied Sciences, Neubrandenburg, Germany

EduServ courses can be followed over the internet from any location and require about 30 hours of online study. Course fees are: €600 for one to two courses, and €700 for three to four courses (participation at the pre-course seminar is included). Fee for attending only the seminar: €100

DISTANCE LEARNING GIS PROGRAMMES

# UNIGIS UK

## Study for a postgraduate qualification in GIS by online distance learning

UNIGIS UK has been at the forefront of GIS education for over 20 years, providing online distance learning-based postgraduate education and training in Geographical Information Systems and Science. Our part-time programmes support the personal and career development of GI professionals and those seeking to enter the GI industry. We support you with personal tutors, online resources and web collaboration software for surgeries and tutorials. There are no examinations, our courses are delivered through our bespoke VLE, and are 100% coursework assessed.

*"The material covered in this course is relevant and up to date. I landed the GIS job I always wished for only 2 months after completing the UNIGIS programme".*

MSc GIS Student 2013

[unigis@mmu.ac.uk](mailto:unigis@mmu.ac.uk)  
+44 (0) 161 247 1581

- part-time online, distance learning
- flexible entry requirements
- one year for the PgC, two years for the PgD, and three years to complete the Masters
- specialist pathways in GIS, Applied GIS, and GI Technologies
- degrees awarded either by Manchester Metropolitan University or the University of Salford
- recognition by the UK Association for Geographical Information (AGI) for continuing professional development
- annual intake in September
- competitive fees with instalment options
- key textbook and industry standard software included
