THE LATEST EDUCATIONAL INFORMATION ON TRAINING COURSES, DISTANCE LEARNING, COMPANY TRAINING DAYS, SEMINARS AND WORKSHOPS CURRENTLY AVAILABLE. THIS SECTION WILL ALSO INCLUDE COMPETITIONS, AND STUDENT OFFERS AMONG OTHER EXCITING OPPORTUNITIES

FIVE-DAY DISASTER RISK MANAGEMENT WORKSHOP IN NAIROBI

Indepth Research Services (IRES) will be holding a five-day workshop on the use of GIS and remote sensing in disaster risk management in Nairobi from January 11 to 15th.

The course is targeted at professionals who require knowledge and skills in the use of GIS and remote sensing in the field of disaster management. Participants are welcome from a broad range of organisations including physical planning, institutions, professionals, and private GIS and remote sensing-related firms.

By the end of the course, you will be able to: describe and use spatial data, GIS and remote sensing in disaster risk assessment and management; use existing sources of historical disaster information and elements at risk data; apply GIS/remote sensing in hazard, vulnerability and risk assessment; use risk information in emergency preparedness planning; visualise hazard and risk information; and apply GIS/remote sensing to post-disaster damage assessment

For further information, telephone: +254 (020) 211 3814 or email outreach@indepthresearch.org

WEB GIS FOR ASSET MANAGEMENT IN THE UK

GeoEnable is offering two courses in the UK for people looking to understand more about the possibilities of using spatial analysis, web GIS and web mapping for infrastructure asset management and the architecture, engineering and construction (AEC) sectors. The main technologies used will be Esri's ArcGIS Online and ArcGIS Pro.

The courses are classroom-based and have a seminar style, with demonstrations and delegate participation. This is not a hands-on course (on the day), but provides real-world examples and thought leadership around the application of web GIS. This is your chance to ask all the questions you wanted to, but never got the chance! You will receive slides and notes.

Following the course, AEC will set you up and start you with your own web GIS (ArcGIS Online demonstration account, or configure your existing account for you). Its team will guide you through this process with weekly 'Web GIS Accelerator' online consultancy to knowledge-share and trouble-shoot. Weekly web meeting/calls last six weeks after the courses.

Dates: January 28 (London), February 16 (Manchester)

DISTANCE LEARNING GIS PROGRAMMES

UNIGIS UK

Study for a postgraduate qualification in GIS by online distance learning

UNIGIS UK has been at the forefront of GIS education for over 20 years, providing online distance learning-based postgraduate education and training in Geographical Information Systems and Science. Our part-time programmes support the personal and career development of GI professionals and those seeking to enter the GI industry. We support you with personal tutors, online resources and web collaboration software for surgeries and tutorials. There are no examinations, our courses are delivered through our bespoke VLE, and are 100% coursework assessed.

"The material covered in this course is relevant and up to date. I landed the GIS job I always wished for only 2 months after completing the UNIGIS programme".

MSc GIS Student 2013

unigis@mmu.ac.uk
+44 (0) 161 247 1581

- part-time online, distance learning
- flexible entry requirements
- one year for the PgC, two years for the PgD, and three years to complete the Masters
- specialist pathways in GIS, Applied GIS, and GI Technologies
- degrees awarded either by Manchester Metropolitan University or the University of Salford
- recognition by the UK Association for Geographical Information (AGI) for continuing professional development
- annual intake in September
- competitive fees with instalment options
- key textbook and industry standard software included
