

TRAINING DAYS

THE LATEST EDUCATIONAL INFORMATION ON TRAINING COURSES, DISTANCE LEARNING, COMPANY TRAINING DAYS, SEMINARS AND WORKSHOPS CURRENTLY AVAILABLE. THIS SECTION WILL ALSO INCLUDE COMPETITIONS, AND STUDENT OFFERS AMONG OTHER EXCITING OPPORTUNITIES

PIX4D SPRING USER WORKSHOP

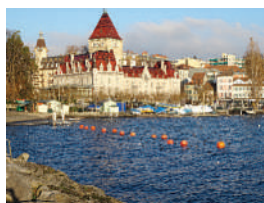

Pix4D is holding its spring user workshop in Lausanne, Switzerland, on March 17 and 18. To be held at its campus on the EPFL Innovation Park, the workshop for Pix4D users and a wide range of professionals is an opportunity to meet face-to-face with the company's experts and develop your knowledge.

The first 'theory' day will cover: modern photogrammetry: from 2D to 3D; applications; data acquisition; Pix4Dcapture app; georeferencing (GCPs); processing steps and most important options; initial processing; point cloud and mesh; DSM, orthomosaic and index calculator; analysis quality report/accuracy control; outputs; dataset combining: terrestrial and aerial, oblique and nadir; large projects – merging; mosaic editor; and index calculator – agriculture applications.

The optional second day with cover practice, including drone flight, and data acquisition and processing. Attendees who complete the workshops will receive a certificate.

Price: €250/day

FME WORLD TOUR

1Spatial is hosting a series of free events in the UK and Australia, to help users to automate their processes, innovate and connect with FME users, under the common theme of 'Connecting Our World'.

The events will include an overview of FME for people who are new to the technology, include some 'deep-dive sessions' for the FME veterans attending and a review the latest capabilities of the new release, FME 2016. As the events attract a mixture of technical and non-technical delegates, 1Spatial always presents the capabilities from a number of angles to ensure there is something for everyone.

The events will be held on the following dates:

- | In the UK | In Australia |
|-------------------------|-----------------------|
| • 12 April: Southampton | • 8 April: Brisbane |
| • 14 April: Cardiff | • 11 April: Melbourne |
| • 20 April: Manchester | • 18 April: Sydney |
| • 22 April: Edinburgh | |

DISTANCE LEARNING GIS PROGRAMMES

UNIGIS UK

Study for a postgraduate qualification in GIS by online distance learning

UNIGIS UK has been at the forefront of GIS education for over 20 years, providing online distance learning-based postgraduate education and training in Geographical Information Systems and Science. Our part-time programmes support the personal and career development of GI professionals and those seeking to enter the GI industry. We support you with personal tutors, online resources and web collaboration software for surgeries and tutorials. There are no examinations, our courses are delivered through our bespoke VLE, and are 100% coursework assessed.

"The material covered in this course is relevant and up to date. I landed the GIS job I always wished for only 2 months after completing the UNIGIS programme".

MSc GIS Student 2013

unigis@mmu.ac.uk
+44 (0) 161 247 1581

- part-time online, distance learning
- flexible entry requirements
- one year for the PgC, two years for the PgD, and three years to complete the Masters
- specialist pathways in GIS, Applied GIS, and GI Technologies
- degrees awarded either by Manchester Metropolitan University or the University of Salford
- recognition by the UK Association for Geographical Information (AGI) for continuing professional development
- annual intake in September
- competitive fees with instalment options
- key textbook and industry standard software included
