3D Repo Appoints Carmen Fan as Chief Technology Officer

3D Repo, the company behind leading cloud software solutions for collaborative **Building Information Modelling (BIM)**, has appointed **Carmen Fan** to the position of Chief Technology Officer. Prior to her promotion, Carmen held a leading technical position at 3D Repo and was also one of the founding members of the London based technology company. She was instrumental in the company's success in the third wave of Canary Wharf Group's Cognicity Challenge, which saw 3D Repo awarded winning place in the 'Virtual Design and Construction' stream for its open source BIM platform. **Dr Jozef Dobos, CEO of 3D Repo** commented, "The promotion of Carmen represents the next stage of our development, where we translate the projects we have been working on – in partnership with some of the leading names in construction and infrastructure – into mass deployment solutions." www.3drepo.org

CSA Ocean Sciences Inc. Receives the Sunshine State Safety Recognition Award

CSA Ocean Sciences Inc. (CSA) has recently received the **Sunshine State Safety Recognition Award** for employee and management emphasis on safety. CSA's commitment to safety is reflected in the daily activities of its personnel as well as the personal involvement from management in support of the safety program. Initiated in 2006 by USF Safety Florida, the Sunshine State Safety Recognition Award commends Florida's employers and employees in all industries who proactively and routinely engage in job safety. The award goes to small businesses that implement sound safety initiatives to better protect employees on the job. "Over 10 years ago, CSA began the journey of strengthening our Health, Safety, Security and Environmental processes," stated Kevin Peterson, CEO of CSA Oceans Sciences Inc. "To the credit of our safety culture as well as all of the dedicated staff of CSA, our company has made great strides in this area." www.csaoc.com

AWARD

Commonplace and Waltham Forest win at Planning Magazine awards

Digital engagement service, **Commonplace** and **London Borough of Waltham Forest** have won the award for best stakeholder engagement in planning at the Planning Magazine awards. The award was made for **Mini Holland**, a visionary programme of integrated neighbourhood improvements to safety and convenience for all road users in the borough. Mini Holland is made up of integrated neighbourhood schemes across the borough. Central to each neighbourhood was a comprehensive engagement process with Commonplace as its hub, around which pop-up events, community meetings and interviews were held. In total, over 25,000 local people took part, providing strong evidence as part of the planning process. Local people viewed the engagement as beneficial, and asked why they had responded, the most popular response was that it would improve the general environment – demonstrating that Mini Holland is meeting broad community needs. www.commonplace.is
