INDONESIAN MINING COMPANY ADARO SELECTS SUPERSURV

Supergeo is pleased to announce that **PT Adaro Indonesia** has selected **SuperSurv** to assist spatial data collection in the field. Founded in 1982, Jakarta, PT Adaro Indonesia is the core subsidiary of Adaro Energy, one of the largest mining and energy group in Indonesia. Adaro Group operates the biggest single-site coal mine in the southern hemisphere in Kalimantan. SuperSurv is one of the most popular GIS apps of Supergeo and supports two

mainstream mobile operating systems- iOS and Android. Other than general GIS capabilities like spatial data creation and deletion, SuperSurv can reach sub-meter precision with ease by its NTRIP solution. The support for OGC standard WMS and WMTS can help users integrate various online resources in the field. For a coal mining company, SuperSurv is an ideal tool to measure the perimeter of the pit and estimate the volume of extracted coal. www.supergeotek.com

NAVITIME JAPAN LAUNCHES "KAMAKURA NAVITIME TRAVEL"

NAVITIME JAPAN Co. Ltd. has expanded its "NAVITIME for Japan Travel" services, launching **Kamakura NAVITIME Travel**, an English-language, travel-information application for use on iOS® devices. This latest application was developed to assist visitors going to Kamakura by providing them informative articles on recommended tourist attractions, restaurants, hotels, etc. when they visit Kamakura. The articles, created in-house by NAVITIME, provide information on 400 locations of interest to visitors, which NAVITIME researched on its own. The locations are categorized under "nature", "culture", "food", "lodging" and others, and include details such as addresses, telephone numbers, opening hours, maps and other useful information about each location. The information is in English, so Japanese who know English, of course, can avail themselves of the informative details. However, the service is ultimately designed for use by non-Japanese, English-speaking visitors to enable them to make the most of their travel time in Kamakura. www.navitime.co.jp

FURUNO INTEGRATES WITH YAMAHA ENGINE GAUGE INTO NAVNET TZTOUCH2 DISPLAY

FURUNO is proud to be one of the first in the industry to integrate a **Multi Function Display (MFD)** with a **YAMAHA Engine** to display the engine gauges and boat status. **FURUNO** collaborated closely with **YAMAHA** to create the interface, while designing the gauge to emulate the familiar **YAMAHA** look and feel. **NavNet TZtouch2** interfaces with **YAMAHA's** Helm Master®, Command Link® and Command Link Plus® to bring the engine data across the network. This marriage of helm navigation and engine data places all of this critical data at your fingertips, making **NavNet TZtouch2** a turnkey solution for efficient control of your boat. Users will actually get to use them from spring 2017, after the software update is available. By adding a **YAMAHA** gateway and a simple software update to the **NavNet TZtouch2** MFD, users will have useful and complete **YAMAHA** engine functions right on the display. www.furuno.co.jp

ORBIT GT AND FIVE STAR ELECTRONIC TECHNOLOGY, CHINA SIGN RESELLER AGREEMENT
