## URTHECAST AND TWENTY FIRST AEROSPACE TECHNOLOGY SIGN A STRATEGIC PARTNERSHIP

**UrtheCast Corp.** and **Twenty First Century Aerospace Technology Co. Ltd** ("21AT"), China's largest independent commercial satellite operator and non-governmental investor in remote sensing satellite systems, announced a long-term strategic partnership to acquire geospatial data from the **UrtheDaily™** Constellation, UrtheCast's planned constellation of Earth observation satellites which will deliver daily, medium resolution imagery of the entire planet's landmass, excluding Antarctica. By entering into this agreement, 21AT becomes a key anchor partner

for the UrtheDaily™ Constellation and UrtheCast's strategic partner for UrtheDaily™ Constellation data within the large Chinese market. 21AT, already one of the world's leading providers of satellite imagery and services, will use the data to build an applications service platform to improve the decision-making services for users across China and beyond. With several years of experience in the industry, 21AT views this flow of data as a highly innovative technical and commercial differentiator for Earth Observation. ## LARGEST SEMICON CHINA EVER TARGETS INDUSTRY GROWTH

More than 70,000 players in the electronics manufacturing industry are expected to descend upon **SEMICON China** for technology and innovation insights to accelerate already strong industry growth. March 14-16, 2018, at the Shanghai New International Expo Centre (SNIEC), SEMICON China 2018 will bring together top executives and technologists in six exhibition halls, the most ever in the event's 30-year

history, to find opportunities in key focus areas including Smart Automotive and Smart Manufacturing, Green Tech, Advanced Technology, and Power and Compound Semiconductors. Concurrent with FPD China, SEMICON China 2018, the largest and most influential gathering of the semiconductor supply chain in China, and the technical forums will address the most pressing industry topics.

## SUPERGEO TEAMS UP WITH DATAGNSS TO PROVIDE A COST-EFFECTIVE RTK SOLUTION

**Supergeo** is delighted to announce that the directors of **DataGNSS**, a professional GNSS RTK device manufacturer, visited Supergeo's Taipei Headquarters at the beginning of December 2017. Supergeo and DataGNSS have now reached a consensus on the collaboration in future product development and marketing. Headquartered in Hong Kong, DataGNSS is a company focused on developing and manufacturing high-precision handheld RTK devices at a reasonable price. Aiming at the market of asset inspection and GIS data

collection, DataGNSS provides Android-based and Windows-based mobile devices with RTK technique at a very competitive price, like its D302-RTK and D402-RTK model. In the future, the Android devices made by DataGNSS will be equipped with SuperSurv 10 to provide a more integrated GIS/GNSS solution. Developed by Supergeo, SuperSurv 10 is one of the greatest Android apps that can help field technicians to collect GIS data, modify attribute tables, and process high-precision NTRIP signals.
