## GLM TAKES NEXT STEPS TO EXPAND ITS BUSINESS WITH DASSAULT SYSTÈMES

**Dassault Systèmes** announced that **GLM Co. Ltd.**, an emerging Japanese developer of environmentally friendly automobiles and related services, has deployed the 3DEXPERIENCE platform to expand its electric vehicle development business. As the first company in Japan to mass-produce an electric sports car, GLM will be able to meet the high demand for its expertise and its own technical platform of electric vehicle development solutions including chassis, power systems, and vehicle control units, which automotive manufacturers and new entrants from other industries are using

to deliver market innovations. **Tomohisa Tanaka, Chief Operation Officer, GLM** said, "Dassault Systèmes' 3DEXPERIENCE platform is widely used by companies in various industries. With it, we expect to reinforce our current partnerships and to expand the range of prospective ones to sectors such as high-tech and materials development. We believe that adopting the 3DEXPERIENCE platform will enable us to accomplish our product development with the full creativity that we always strive for."

## SOFTBANK MOBILE CHOOSE ATRACK AP3 FOR CORPORATE VEHICLE MANAGEMENT

**ATrack Technology Inc.** announced that its newly launched 4G LTE cigar lighter GPS tracker AP3 has been selected by Softbank Mobile, a subsidiary of SoftBank Group Corp., for company vehicle management solution in Japan. Softbank Mobile is one of the top three telecommunications operators in Japan with nearly 40 million subscribers. ATrack has been working with **Softbank** Mobile for 2 years aiming to combine the advantages from both parties including brand awareness, R&D capability, and localized experiences to offer a comprehensive fleet

management solution for millions of corporate vehicles in Japan. After rigorous validation, AP3 was selected for its excellent quality, stability and functionality. ATrack AP3 is a 4G LTE tracking device that can be powered via cigar port in nearly all types of vehicle. It offers simple plug and play installation and provides real-time location tracking with in-built g-sensors for driver behaviour monitoring.

## AUTOTALKS EXPANDS INTO CHINA WITH ITS TRULY SECURE LTE-V2X SOLUTION

**Autotalks** is expanding its operations to **China** in order to bring its disruptive global V2X offering to the Chinese intelligent and connected vehicle industry. LTE-V2X technology has been recently gaining strong momentum in China. To support the expansion, Autotalks recruited Mr. **Xiaobing Yang**, who will lead Autotalks' business development efforts in China out of Autotalks' new branch in Beijing. Mr. Yang brings to Autotalks over 25 years of experience in the Chinese telecom industry. Recently, Autotalks launched the first ever global V2X solution supporting both DSRC and LTE-V2X (also known as C-V2X) based on its second generation mature chipset with the intention of expanding its global footprint into China. Autotalks' LTE-V2X direct communications (PC5) solution is separated from the cellular Network Access Device (NAD), resulting in a truly secure and cost-effective standalone LTE-V2X solution.
