INDONESIAN SPACE AGENCY CEMENTS PLANS TO WORK WITH ECOMETRICA ON DEFORESTATION DATA

Downstream space and sustainability company **Ecometrica** has made a long-term commitment to collaborate with Indonesian **National Institute of Aeronautics and Space (LAPAN)** and **Bogor Agricultural University (IPB)** beyond the Forests 2020 project, by signing a memorandum of understanding. The agreement will ensure the company's continued involvement in Indonesia and its role in supporting sustainable forest management and the

conservation of tropical forests. The UK-based firm, whose advanced platform allows data from satellites, such as the **Sentinel** constellations, to be used to track changes of forests, has been helping to monitor the effects of palm oil plantation and other agricultural sectors on Indonesia's tropical rainforests, while guiding efforts to reverse deforestation through the UK Space Agency-funded Forests 2020 initiative.

Tokyo-headquartered **Terra Drone** Corporation has finalized its expansion into the Australian market after completing an equity investment in Australian firm, **C4D Intel Pty Ltd**. As part of the deal, C4D Intel will immediately rebrand to Terra Drone Australia. The move by Terra Drone is the latest of the company's investments into leading drone technology businesses across the globe and demonstrates the Japanese company's commitment to the Australian market.

MANGOESMAPPING TO PROVIDE ATMOS UAV DRONES IN AUSTRALIA

Mangoesmapping has been selected as the Australian distributor for Dutch drone company **Atmos UAV**, which specialises in high-end VTOL fixed-wing drones for surveying and mapping. Queensland-based Mangoesmapping has more than 20 years of geospatial knowledge in national and remote communities and it has received numerous accolades in innovation, spatial enabling, environment and sustainability. It is also an exclusive distributor for

other known brands like DJI, NextCore, etc. With this alliance, Atmos UAV says it is setting down in Australasia to provide assistance and service to its flagship product **Marlyn VTOL** drone customers. Marlyn can take off vertically from anywhere with its proprietary configuration that blends mapping and surveying and effectively generates high-quality data for skilled customers.

TERRA DRONE EXPANDS TO AUSTRALIA WITH INVESTMENT IN LOCAL UAV SERVICES PROVIDER

Founded in 2016, C4D Intel is an industry innovation leader that provides surveying, inspection, and 3D modeling services to a diverse client base across mining, oil and gas, power, and forestry industries in Western Australia. As Terra Drone Australia, the company will be able to leverage the additional growth capital to expand its service offering to include unmanned airborne LiDAR, bring innovative Terra Group technologies to Australia, and expand its operations to the East coast of Australia.
