SKY PERFECT JSAT SIGNS CONTRACT WITH AIRBUS TO BUILD SUPERBIRD-9 TELECOMMUNICATIONS SATELLITE

SKY Perfect JSAT Corporation, the main satellite operator in Japan and the Fixed Satellite Service provider, has selected Airbus to build Superbird-9, a fully digital in-orbit reconfigurable telecommunications satellite. The satellite will be based on Airbus' standardised **OneSat product line**. Airbus will provide a **turnkey solution**, including design and manufacture of the Superbird-9 spacecraft, associated services and support for in-orbit operations and ground segment, as well as an advanced digital suite to manage the digital payload and operate the end-to-end satellite resources. OneSat will allow SKY Perfect JSAT to replace a key broadcasting mission and to simultaneously deliver fully flexible **HTS (High Throughput Satellite) services** with powerful performance and a ground-breaking experience for their customers. www.jsat.net

TERRA DRONE, INPEX LAUNCH "INPEX-TERRA DRONE INTELLIGENT DRONE PLAN"

Terra Drone Corporation, and INPEX CORPORATION jointly announced a capital tie-up and the launch of the **INPEX-Terra Drone Intelligent Drone Plan**. Terra Drone is an air mobility start up with technical expertise in automated flight and operational management of air mobility solutions including **drones** and **flying automobiles**. Terra Drone aims to be Japan's first leader in the global market by offering solutions to social issues across a variety of fields focusing on **infrastructure inspection, disaster response, security and operational management** including the link-up of manned and unmanned vehicles. INPEX strives to be a leading energy company playing an essential role in global society by meeting the energy needs of Japan and countries around the world and contributing to the creation of a brighter future for society through developing, producing and delivering energy in a sustainable way. www.terra-drone.net

ATRACK AK11 LTE FLEET HUB CERTIFIED ON T-MOBILE NETWORK

ATrack Technology, an Internet of Vehicles (IoV) company based in Taiwan, announced that AK11 LTE Fleet Hub has been certified for activation on **T-Mobile's wireless network**. The addition of T-Mobile certification is another step towards growing ATrack's **U.S. market** and will provide more differentiated solutions for our customers to stay competitive in this rapid growing industry. As T-Mobile completed its

merger with Sprint Corporation, ATrack took the lead to apply for the "New T Mobile" certification for the 4G flagship model - **AK11 LTE Fleet Hub**. AK11 is a multi-functional telematics device supporting wireless communication technology of 4G, 3G, Bluetooth and Wi-Fi hotspot, with multiple GPIOs to fulfil sensor monitoring applications. Supporting OBD-II, SAE J1939 & J1708 protocols makes it compatible

with light vehicles/medium trucks to heavy duty trucks. www.atrack.com.tw
