PEOPLE

Silicon Sensing appoints new Chief Engineer

Dr Mark Marshall has been appointed as Chief Engineer of Silicon Sensing Systems Ltd. Dr Marshall joined Silicon Sensing in 2017 as the lead engineer on numerous inertial programmes. Immediately prior to commencing as Chief Engineer he was the company's **Consultant Engineer and Electronics Discipline Manager**. In this role, he was responsible for the electronics and mechanical design of the company's latest generation, tactical grade inertial measurement unit (IMU) - the DMU41. www.siliconsensing.com

PEOPLE

Sepura Recruit Country Manager for Australian Critical Communications Market

Ronan Rafferty has joined Sepura's successful Sales Team in Australia, taking the role of Country Manager. He joins at an exciting time for Sepura as they deploy the first **VHF TETRA terminals** to the market and continue to develop opportunities for broadband solutions. Ronan will be taking over leadership of the team from Doug Bowden who is planning to retire later in 2023. He has the opportunity to build on Sepura considerable success in Australia, where over **120,000 TETRA radio terminals** have now been deployed, primarily in mining but also on transport, utilities, and commercial sites. www.sepura.com

AWARD

Rovco makes two new key appointments as it diversifies and grows

Rovco, a global provider of advanced subsea robotics and integrated survey solutions to the offshore wind and oil field decommissioning sectors, has taken a major step forward as it progresses ambitious plans for greater global and sectoral growth. Marc Coull has been promoted to **Director of Inspection, Repair and Maintenance (IRM)**, which takes in the state-of-the-art subsea robotics-based IRM work that has been the foundation of the company's operations since its inception. Craig Davis takes up the new role of Director of Site Characterisation, and will be responsible for leading the development of the company's dedicated new marine site characterisation business unit. www.rovco.com

AWARD

Frequentis and Avinor win the "Overall Excellence" Air Traffic Management Award

Avinor, the airport operator and Air Navigation Service Provider (ANSP) of Norway has been working on a project to **increase safety** for the air ambulance and drone operators in Norway through data sharing. A key challenge was sharing the information of planned and active **drone flights** with emergency helicopters operated by the **Norwegian Air Ambulance**. These helicopters often operate in dynamic and high-pressure environments, and the added workload of looking for drones needed to be addressed. www.frequentis.com
